FY 2023 – 2ND QUARTER

Region 10 PIHP
Michigan Mission-Based Performance Indicator System

FY2023 –2nd Quarter Summary Report

(January 1, 2023 – March 31, 2023)

This report is a summary of the performance indicators reported to the Michigan Department of Health and Human Services (MDHHS) by the PIHP (data aggregated from CMH / SUD providers). The Michigan Mission-Based Performance Indicator System (MMBPIS) was implemented in fiscal year 1997. The indicators have been revised over time, with the current revision effective April 1, 2020.

The indicators measure the performance of the PIHP for Medicaid beneficiaries served through the CMH/SUD affiliates. Since the indicators are a measure of performance, deviations from standards and negative statistical outliers may be addressed through contract action. Information from these indicators will be published on the MDHHS website within 90 days of the close of the reporting period.

This report summarizes the PIHP's results from the second quarter of fiscal year 2023 as well as trending information for the past three years of Performance Indicator data.

Performance Indicator 1

Indicator 1.a. The percentage of children receiving a pre-admission screening for psychiatric inpatient care for whom the disposition was completed within three hours. *The standard is 95%.*

Performance Indicator 8

Indicator 8.a. The percent of adults with mental illness served by the CMHSPs and PIHPs that are employed competitively. The numbers below are calculations by MDHHS. This represents the total for FY2022.

Population	Total # of Enrollees	# of Enrollees who are competitively employed	Competitive employment rate
Region 10 PIHP	9612	1683	17.52%

Indicator 8.b. The percent of adults with developmental disabilities served by the CMHSPs and PIHPs that are employed competitively. The numbers below are calculations by MDHHS. This represents the total for FY2022.

Population	Total # of Enrollees	# of Enrollees who are competitively employed	Competitive employment rate
Region 10 PIHP	1583	105	6.63%

Indicator 8.c. The percent of adults dually diagnosed with mental illness/developmental disabilities served by the CMHSPs and PIHPs that are employed competitively. The numbers below are calculations by MDHHS. This represents the total for FY2022.

Population	Total # of Enrollees	# of Enrollees who are competitively employed	Competitive employment rate
Region 10 PIHP	1274	109	8.56%

Performance Indicator 9

Indicator 9.a. The percent of adults with mental illness served by the CMHSPs and PIHPs who earned minimum wage or more from any employment activities (competitive, supported or self-employment, or sheltered workshop). The numbers below are calculations by MDHHS. This represents the total for FY2022.

Population	Total # of Enrollees	# of Enrollees who earned minimum wage or more	Competitive employment rate
Region 10 PIHP	1702	1685	99.94%

Indicator 9.b. The percent of adults with developmental disabilities, served by the CMHSPs and PIHPs who earned minimum wage or more from any employment activities (competitive, supported or self-employment, or sheltered workshop). The numbers below are calculations by MDHHS. This represents the total for FY2022.

Population	Total # of Enrollees	# of Enrollees who earned minimum wage or more	Competitive employment rate
Region 10 PIHP	200	127	94.07%

Indicator 9.c. The percent of adults dually diagnosed with mental illness/developmental disabilities served by the CMHSPs and PIHPs who earned minimum wage or more from any employment activities (competitive, supported or self-employment, or sheltered workshop). The numbers below are calculations by MDHHS. This represents the total for FY2022.

Population	Total # of Enrollees	# of Enrollees who earned minimum wage or more	Competitive employment rate
PIHP Totals	152	118	94.40%

Performance Indicator 10

Indicator 10.a. The percentage of children readmitted to an inpatient psychiatric unit within 30 calendar days of discharge from a psychiatric inpatient unit.
15% or less within 30 days is the standard.

Performance Indicator 13

Indicator 13.a The percent of adults with developmental disabilities served, who live in a private residence alone, with spouse, or non-relative(s). The numbers below are calculations by MDHHS. This represents the total for FY2022.

Population	Total # of Enrollees	# of Enrollees with a developmental disability who live in a private residence alone, with spouse or non-relatives	Private residence rate
Region 10 PIHP	1583	265	16.74%

Indicator 13.b The percent of adults dually diagnosed with mental illness/developmental disabilities served, who live in a private residence alone, with spouse, or non-relative(s). The numbers below are calculations by MDHHS. This represents the total for FY2022.

Population	Total # of Enrollees	# of Enrollees with a developmental disability who live in a private residence alone, with spouse or non-relatives	Private residence rate
Region 10 PIHP	1274	312	24.49%

Performance Indicator 14

Indicator 14. The percent of adults with serious mental illness served, who live in a private residence alone, with spouse, or non-relative(s). The numbers below are calculations by MDHHS. This represents the total for FY2022.

Population	Total # of Enrollees	# of Enrollees with serious mental illness who live alone, with spouse or non-relative	Private residence rate
Region 10 PIHP	9612	4456	46.36%

NARRATIVE OF RESULTS

The following PIHP Performance Indicators for Medicaid consumers have performance standards that have been set by the Michigan Department of Health and Human Services, except for Indicators #2a, #2b, and #3.

Performance Indicator #1 states: *“The percentage of persons receiving a pre-admission screening for psychiatric inpatient care for whom the disposition was completed within three hours.”* **The set performance standard is 95%.** All CMHs met the standard for this indicator.

Performance Indicator #2a states: *“The percentage of new persons receiving a completed biopsychosocial assessment within 14 calendar days of a non-emergency request for service.”* There is no standard for this indicator. The total CMH compliance rates ranged from 43.08% - 71.07%.

Performance Indicator #2b states: *“The percentage new persons receiving a face-to-face service for treatment or supports within 14 calendar days of a non-emergency request for service for persons with Substance Use Disorders.”* There is no standard for this indicator. The SUD network had an estimated compliance rate of 73.26%

Performance Indicator #3 states, *“The percent of new persons starting any medically necessary on-going covered service within 14 days of completing a non-emergent biopsychosocial assessment.”* There is no standard for this indicator. The total CMH compliance rates ranged from 57.69% - 97.86%.

Performance Indicator #4 states, *“The percentage of persons discharged from a psychiatric inpatient unit (or SUD Detox Unit) who are seen for follow-up care within seven days.”* **The set performance standard is 95%.** All CMHs met the standard for this indicator for the children population breakout. Genesee Health System (GHS) did not meet the standard for the population breakout of adults with 93.51%. The SUD system did not meet the standard for the SUD population with 91.01%.

Performance Indicator #10 states, *“The percentage of persons readmitted to an inpatient psychiatric unit within 30 calendar days of discharge from a psychiatric inpatient unit.”* **The set performance standard is 15% or less.** All CMHs met the standard for this indicator for both the children and adult population breakouts.

When a CMH reports that the MDHHS standard for a performance indicator has not been achieved during a quarter, a root cause analysis and plan of improvement are submitted to Region 10 PIHP along with the respective CMH data. The analysis is reviewed, and the plan of improvement is monitored over time by the PIHP along with the trend of scores on all the performance indicators.

If a set standard benchmark is not achieved for the region, the indicator is investigated further by various committees within the QAPIP structure such as Quality Improvement Committee, Quality Management Committee, and Improving Practices Leadership Team to increase input from CMH partners, identify contributing factors and systemic issues for the outliers, and review opportunities for improvement across the region.

Additionally, for indicators that do not have set performance standards, CMHs and SUD Providers submit written root cause analyses and plans of improvement to the PIHP. The Providers evaluate reasons for noncompliance to address barriers and improve individuals' access to care and services.

Root Cause Analyses / Corrective Action Plans

Genesee Health System (GHS) –

PI #4a Adult- Follow-up service within seven days of discharge

Root Cause Analysis revealed 12 individuals did not receive a follow up service within seven days of hospital discharge. The readmissions were due to various reasons, including individuals discharging to step-down services, individuals choosing to participate in Crisis Stabilization services, individuals being provided walk-in intake information and electing not to present for follow-up, individuals not presenting to their scheduled follow-up appointments, and an individual electing to participate in substance user disorder treatment directly following inpatient admission.

The following plan was submitted by GHS: When GHS is aware of individuals admitted to inpatient units that may benefit from GHS services, hospital liaisons outreach to the individual during their admission to discuss the importance of follow-up, and their needs and wishes for ongoing treatment. Additionally, GHS will ensure consumers, parents, and guardians are aware that there are no barriers to care in the way that meets their preferences. Lastly, coordination is occurring with the hospital systems to improve the rate of scheduled intake appointments as part of inpatient discharge planning.

Region 10 SUD System –

PI #4b – Follow-up service within seven days of discharge

Further review revealed eight individuals were not seen for follow-up care within seven days of discharge from a detox unit. Outreach to two SUD Providers missing the follow-up care standard will occur via the PIHP's Provider Network Management department.

The SUD Providers not meeting the set performance standard are expected to submit Root Cause Analyses and Plans of Correction. To address systemic issues, the PIHP will review SUD Provider discharge processes, Root Cause Analyses, and Plans of Correction. Because the set standard benchmark was not achieved for the region, investigation and discussion will occur among PIHP Quality Management, Data Management, Clinical, and Provider Network Management department staff.

Additional oversight and follow-up regarding corrective action items will occur through the contract monitoring process.

Root Cause Analyses / Plans of Improvement

Genesee Health System (GHS) –

PI #2a – Assessment within 14 days of request

Root cause analysis revealed that individuals did not receive an assessment within 14 days mostly due to individuals cancelling or not showing to their appointments or individuals scheduling and/or rescheduling their appointments to a date outside of the 14-day window due to the consumer's preference. GHS also reported individuals were encouraged to complete the intake process using walk-in services, at their convenience, and chose not to present for intake.

The following plan was submitted by GHS: GHS will continue to implement and revise their FY2021 plan. GHS is committed to increasing options for home or community visits, offering phone or videoconferencing, increasing ability to offer same-day services, and utilizing Navigators or Care Specialists from Access to support individuals between Access and Intake. In the third quarter, GHS filled several new intake positions to allow for more walk-in appointments, improve time to first services, and work to decrease no-shows and cancellations. In October 2022, the intake department switched from appointments to walk-ins to make intakes more flexible and increase compliance with Biopsychosocial assessments. GHS will ensure that information regarding the array of virtual and phone services

under the GHS umbrella is provided, taking special care to share information regarding the GHS Behavioral Health Urgent Care (BHUC) Virtual Office hours to provide phone support. Lastly, the GHS intake department has started offering in person intakes for children at two locations to increase flexibility for families working to get their children connected with services.

PI #3 – Ongoing service within 14 days of assessment

Root cause analysis revealed that ten individuals did not receive a service within 14 days of their assessment due to individuals not showing for their appointments, individuals cancelling appointments, individuals requesting and/or rescheduling appointments outside of the 14-day window, or individuals declining services.

The following plan was submitted by GHS: GHS will provide linking and/or coordinating for immediate needs. To address barriers and meet individuals' preferences, GHS will also make consumers, parents, and guardians aware of other service options including via phone, videoconferencing, home-based services, and services in the community. In March 2023, GHS started a pilot program to link consumers to med clinic services from intake, within 14 days, independent of, but alongside case management services. This pilot program is offered to adult consumers with Severe Mental Illness (SMI) only. It is believed that addressing any medication needs directly following intake will increase consumer engagement, meet their needs in a more timely manner, and potentially decrease crisis utilization. Lastly, GHS noted some providers in their external network are experiencing staffing shortages to the extent they have limited first service appointments available for scheduling. To assist, GHS has absorbed as much of the consumer volume internally as possible, while continuing to honor consumer choice.

Lapeer CMH –

PI #2a – Assessment within 14 days of request

Root cause analysis revealed that individuals did not receive an assessment within 14 days due to individuals not showing for their appointments, individuals cancelling appointments, or individuals rescheduling appointments outside of the 14-day window.

The following plan was submitted by Lapeer CMH: Staff will continue to monitor the intake calendar for individuals that did not show for their scheduled appointment and attempt outreach by phone, letter, or adverse benefit determination to attempt timely rescheduled appointment dates.

PI #3 – Ongoing service within 14 days of assessment

Root cause analysis revealed that individuals did not receive a service within 14 days of their assessment due to individuals not showing for their appointments, individuals cancelling appointments, or individuals rescheduling appointments outside of the 14-day window. Additionally, limited staffing led to the unavailability of timely appointments for individuals.

The following plan was submitted by Lapeer CMH: Staff will continue to attempt outreach via phone, letter, and adverse benefit determinations for prompt rescheduling of appointments. Additionally, intake clinicians will notify their supervisor if there are no available appointments on the department's Individual Plan of Service (IPOS) calendar within 14 days and will continue to provide IPOS appointment date and time prior to leaving their initial intake appointment. Human Resources will also continue to assist with hiring in departments that are short-staffed.

Sanilac CMH –

PI #2a – Assessment within 14 days of request

Root cause analysis revealed individuals did not receive an assessment within 14 days mostly due to individuals not showing for their appointments or individuals cancelling and rescheduling their appointments to a date outside of the 14-day window. One individual was not seen due to a staff member being ill and the individual not being able to be rescheduled with another staff that day.

The following plan was submitted by Sanilac CMH: Individuals receive a reminder text message or phone call the day before their scheduled appointment. Sanilac CMH staff attempt to reschedule missed or cancelled appointments within 14 days of the original request. Clinical staff will continue to fill in for staff absences as often as possible.

PI #3 – Ongoing service within 14 days of assessment

Root cause analysis revealed individuals did not receive a service within 14 days of their assessment due to individuals not showing for their appointments or individuals cancelling and rescheduling their appointments to a later date. Additionally, two individuals refused appointments offered within the 14-day window.

The following plan was submitted by Sanilac CMH: Appointments are confirmed one day in advance via text or phone call. Individuals receive appointment cards which include appointment date and time, crisis line contact information, and contact information for the primary worker that their appointment is scheduled with. Clinicians stress the importance of keeping appointments.

St. Clair CMH –

PI #2a – Assessment within 14 days of request

Root cause analysis revealed individuals did not receive an assessment within 14 days for various reasons including unsuccessful outreaches to engage individuals in services, refusal of CMH services, not showing for scheduled appointments, or canceling or rescheduling appointments. Additional barriers were noted such as transportation, scheduling conflicts, and inaccurate contact information provided by the individuals.

The following plan was submitted by St. Clair CMH: St. Clair CMH will offer the appropriate level of service available. The CMH Program Director will review cases to ensure intake staff and/or screening staff collect accurate contact information necessary to engage individuals in scheduling service. Different levels of outreach will be assessed and provided as medically necessary.

PI #3 – Ongoing service within 14 days of assessment

Root cause analysis revealed individuals did not receive a service within 14 days of their assessment for various reasons including unsuccessful outreaches to engage individuals in services, refusal of CMH services, not showing for scheduled appointments, or canceling or rescheduling appointments. Additional barriers were noted such as homelessness, transportation, scheduling conflicts, and inaccurate contact information being provided by consumers.

The following plan was submitted by St. Clair CMH: St. Clair CMH will offer the appropriate level of service available. The CMH Program Director will review cases to ensure Program Supervisors and staff collect accurate contact information necessary to engage individuals in scheduling service, as well as addressing the importance of following through with the recommended level of care that is offered.

Region 10 SUD System –

PI #2b – First service within 14 days of request

There were 508 individuals not seen for their first service within 14 days of the original request. Outreach to 12 SUD Providers will occur via the PIHP's Provider Network Management department.

The SUD Providers with one or more cases out of compliance are expected to submit root cause analyses and plans of improvement. SUD Providers will analyze reasons for noncompliance for PI #2b then submit a plan to the PIHP to report on the evaluated and prioritized reasons for noncompliant events. The plan shall indicate how the Provider will improve individuals' access to care and services.
